TECHCATALOG

COMPARING GLOBAL AND LOCAL ELECTRONICS
PRICES

TEAM MEMBERS:

MURADI ALSHAMMARI
JOUDE ALHARBI

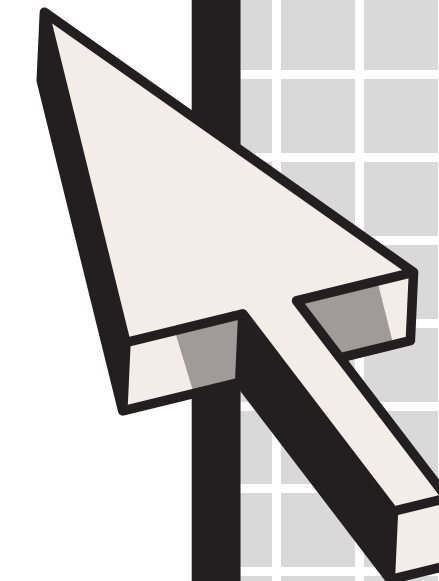

HANEEN ALOTAIBI
ASEEL ALDUKHAEL

WHAT IS TECHCATALOG?

TechCatalog is a platform that compares consumer electronics prices between global and local markets using an automated data pipeline.

OBJECTIVES:

- Collect product prices from different sources.
- Make prices easy to compare.
- Help users find the better price.
- Save time when comparing prices.

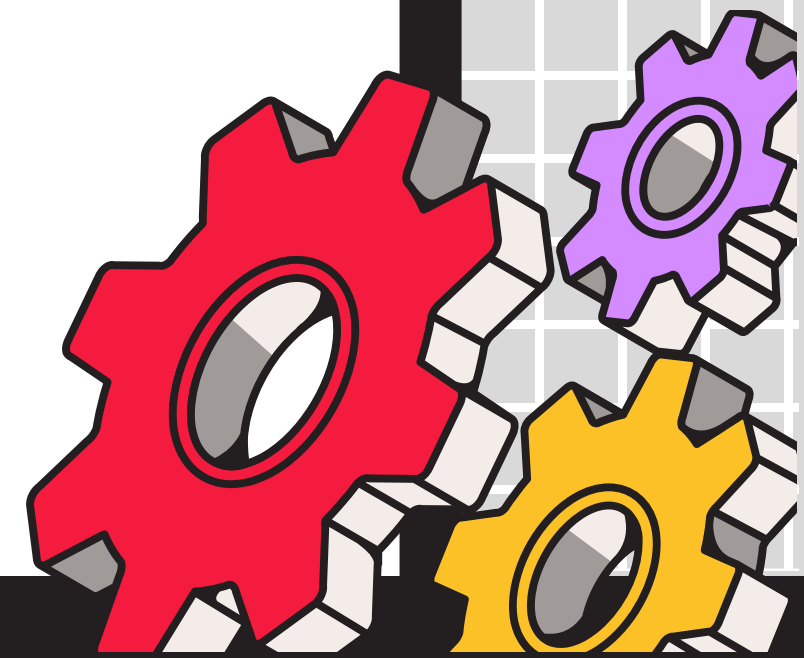

PROBLEM STATEMENT

Current Challenges:

- Comparing prices across many websites takes time.
- Manual currency conversion can give wrong results.
- It is not easy to see which market has the better price.

Impact:

- People may spend more money.
- Price comparison takes more time.
- It is harder to make a good buying decision.

PROPOSED SOLUTION

TechCatalog will:

- Collect product prices from global and local sources.
- Clean and organize the data.
- Convert prices to SAR.
- Compare prices automatically.
- Show the price difference clearly.

Our Role:

We build a data pipeline that collects, processes, and stores pricing data for comparison and analysis.

DATA SOURCES

Local source:

- Jarir

Global Source:

- Best Buy

Why These Sources?

- Trusted and well-known retailers.
- Clear and accessible product pricing.
- Represent both global and local markets.

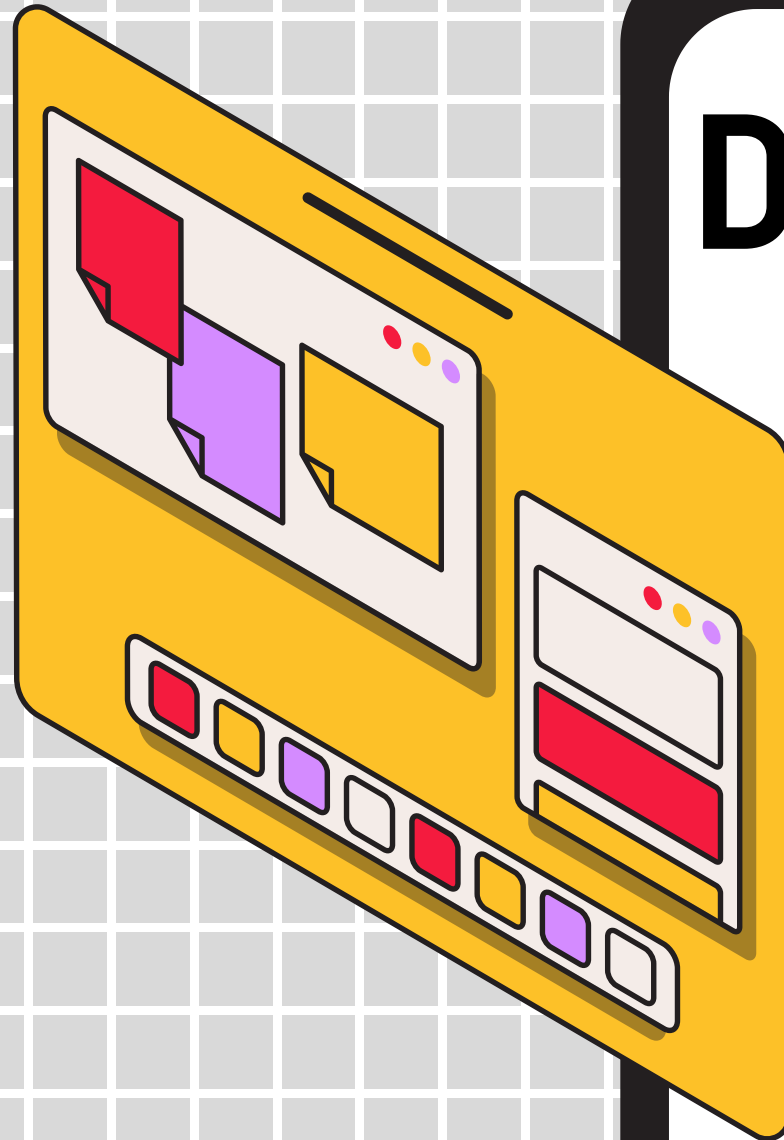

DATA COLLECTION METHOD

How Will We Collect Data?

- Extract product names and prices from retailer websites.
- Gather pricing information from selected sources.
- Organize the collected data for processing and comparison.

EXPECTED WORKFLOW

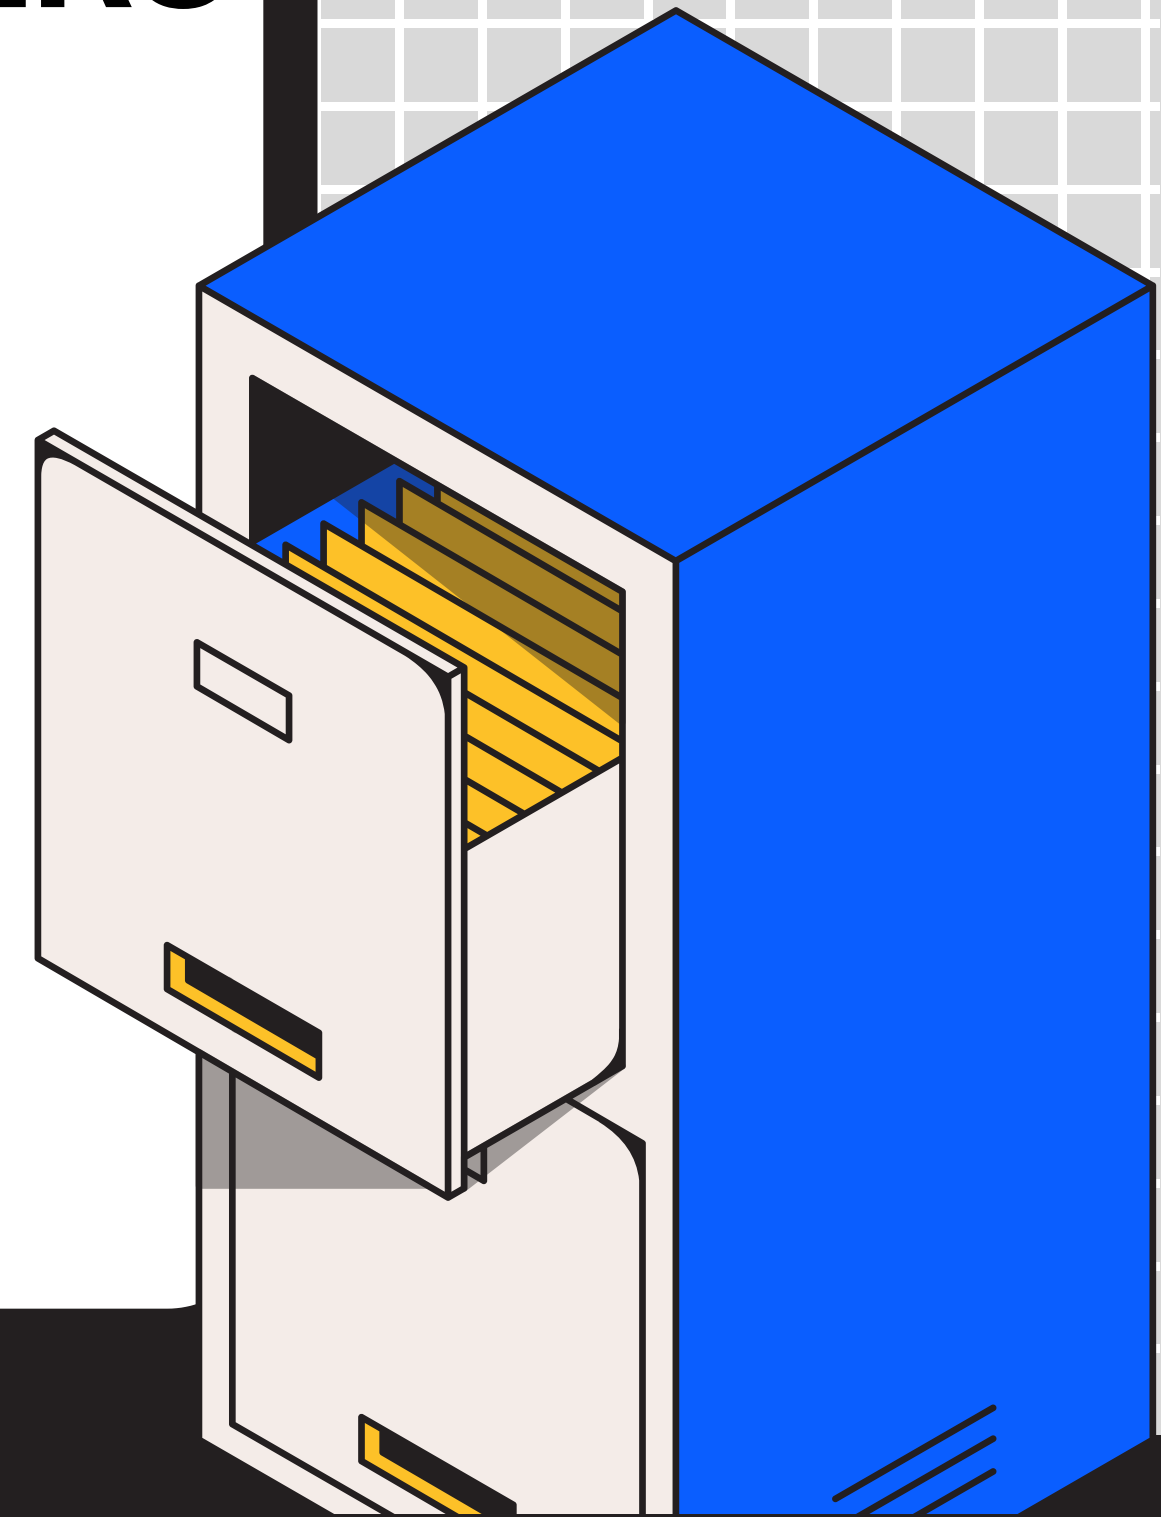

DATA STORAGE & TARGET USERS

Data Storage:

- Processed data will be stored in a database.
- The database will support future analysis and reporting.

Target Users:

- Consumers looking for the best prices.
- Market analysts studying market trends and price differences.
